

SOLAR FIRE INTERPRETATIONS REPORT

Solar Fire Midpoint Interpretations

(c) 2008, Esoteric Technologies Pty Ltd

This report provides you with a list and interpretations of the planets or points and their aspects to midpoints in your chart. You will note the number of items in this midpoint report can vary depending on the modulus degree value and orb that are selected. The modulus degree value is associated with a harmonic of the chart. For example, selecting a modulus of 360° will show planets to midpoints that are conjunct in a normal 360° chart wheel. Selecting a modulus of 90° (the 4th harmonic) shows planets to midpoints that are in either conjunction, opposition or square to the midpoint. For general midpoint work, the 90° modulus is the one normally used but other values may also be used.

The order in which planet to midpoint is presented is based on the degree from Aries to Pisces the midpoint is placed. This is the same order as used in Solar Fire's Midpoint Axes and Midpoint Trees reports.

The Solar Fire Midpoint interpretations text has been written by UK astrologer Julian Venables. Julian works in England as a client-based astrologer, teaching beginners' classes as well as conducting private tuition. He holds a certificate from The Faculty of Astrological Studies and has completed his Diploma studies and Exams. Julian was on the committee of The Astrology Lodge of London and is a member of The Astrological Association of Great Britain.
